## StoreMobile^{INV}

RTC Mobilizes MMS - Allowing mobile users to View, Collect and Manage key information in real-time to JDA® MMS® on Android & Windows Tablets and mobile devices

Imagine performing traditional back office functions such as: inventory counts, receiving, transfers or item look ups real-time into JDA® Merchandise Management System® (MMS®), from a simple handheld RF device or tablet, without leaving the sales floor.

RTC brings you StoreMobile INV, the answer for retailers looking for increased mobility in managing their JDA® MMS® operations. This powerful wireless solution is designed to allow JDA® MMS® users to improve their operational workflow while viewing, collecting and managing key information real-time to JDA® MMS®, from anywhere in the store, saving them time and money.

This fully integrated solution leverages your current JDA® MMS® investment, to give users more access to corporate data and increased control, accuracy, efficiency and accountability. With StoreMobile INV, you can maximize staff productivity by keeping Sales staff on the sales floor instead of chained to the back office. Utilizing real-time data saves time and allows fewer errors while eliminating duplicate processing and unnecessary paperwork to provide impressive ROI. *Typical implementation is 2 to 3 weeks.*
